Hey Stephen-

I hope demob goes well today. I would argue that since EPA is no longer going to be involved at the Site, we don't need to enter into an agreement with OSHA... If Dave does pursue this next week, keep me in the loop and send me whatever draft agreement he sends to you.

Great work out there!

David,

I have copied Kris Leefers who is our EPA emergency response attorney working on the US Ecology site with me. She can be reached at 206 553 1532. I have also copied Albert Crawshaw who is the IDEQ lead for the site. He can be reached at 208 373 0469

Also, as an update I anticipate demobilization of all EPA assets sometime today. The scene is stabilized and IDEQ is stepping up to fill the continued need for long-term oversight per their delegated RCRA authority. US Ecology owes me a few deliverables and they will still be providing me with significant updates in the near future, but I do not plan to be back on site and I will be exiting Unified Command.

We have tracked the movement of all waste containers during our tenure here and can provide that information if useful. To summarize containers have been moved away from the building footprint, but are still located in the general area in front of the building. Once IDEQ approves a permanent storage location I believe US Ecology plans to move all containers to that area per RCRA permit waste storage requirements.

Let me know if you have any questions and thanks for the continued coordination and support!

Thanks,

Stephen Ball

I could coordinate with someone tomorrow or Friday. We probably won't be able to get anything signed until next week due to the holidays. I feel comfortable about the site and evidence control currently occurring.

Thanks for the cooperation. Let me know who you'd like me to reach out to. We can involve our solicitors too.

Dave

David,

Is there someone in your shop that can speak with my EPA attorney regarding this document? She and my ER chief just have a few questions regarding who from the agency should be named and how we fit into the document.

Thanks,

Stephen Ball

Subject: Evidence and Site Control Agreement

Importance: High

Mr. Teig, Mr. Kiddy, and Mr. Ball,

Due to the circumstances involved with the November 17 incident at US Ecology in Grandview, we need an evidence and site control agreement to be shared among parties involved in the investigation and clean up. If you already have one in place, please let me know. OSHA would like to be added as a signatory.

Otherwise, for my drafting of the agreement, I will list OSHA, US Ecology Idaho, Inc., and US Environmental Protection Agency. Please let me know what names and job titles should be used. Also, please let me know if you think there are other investigating parties who should be included, such as DEQ. NOTE: I spoke with the Chemical Safety Board yesterday. They do not plan to send an investigator.

Please note that representatives from our Health Response Team out of Salt Lake City will be here next Monday and Tuesday to visit the site and assist with evidence collection.

I will be away from the office tomorrow, returning Friday. But I plan to check emails periodically through Wednesday and Thursday. I can also be reached by my personal cell phone if urgent at (b) (6)

Regards,

David Kearns, MPA, CIH
